Powerline Turbo Starter Kit

Powerline Turbo kit allows you to reliably transmit content from your Internet directly to your computer and other network devices through the electrical wires in your home. For areas in a home that are hard to reach by wireless connections, Powerline is the most reliable solution for providing secure Internet connectivity to these remote areas.

Setup of Powerline is simple with its plug-and-play connectivity. Connect one adapter to your router and plug into an available electrical outlet. Plug the second adpter into an available wall outlet and connect the other end to any device with an available Ethernet port such as a gaming console, set-top box, or computer.

Benefits

- Includes extension power cables for the optional placement of powerline adapter away from the electrical outlet
- Data speeds of up to 85Mbps
- Kit includes one single port adapter for a computer and another single port adapter to plug into a router
- Transfers data at speeds of up to 85Mbps
- Security: 64-bit AES link encryption with key management for secure powerline communications
- Operating range: Up to 300m in wall powerlines
- IEEE 802.3/802.3u
- HomePlug 1.0 certified
